

FARMING

FARMING

Almarai's superfarms are the biggest and best in the world. They were the first dairy farms to be awarded by the British Standard Institute for complying with the requirements of ISO 9001:2000 and they have maintained this prestigious standard.

The farms have first class modern facilities and apply to top class husbandry techniques in the areas of nutrition, health, fertility and environmental control. The Farming Division manages over 100,000 livestock and 60,000 are cows milked in a fresh milk every day.

Top quality feeds sourced from around the world are fed to the cows. Almarai also produces maize silage and alfalfa hay from its own Arable Farms. These crops are grown under centre pivot irrigation systems and harvested with modern large scale machinery to ensure that quality and freshness is maintained.

Centralized support services are provided for veterinary, animal nutrition, quality assurance, business and administration, human resources, health & safety, and financial management.

Come and join us to experience the best with Almarai's top milk and arable producing farms.
